Summary

Web Developer with 2+ years of hands-on experience building responsive and user-focused web applications using HTML, CSS, JavaScript, and React.js. Skilled in implementing modern and visually appealing UI designs using Tailwind CSS and Bootstrap, along with component libraries such as React Bits and Ulverse. Experienced in integrating RESTful APIs and optimizing application performance to deliver smooth user experiences. Possess foundational knowledge in back-end development using Node.js, Express.js, and MongoDB, with the ability to build scalable APIs.

Work Experience

Software Development Fundamentals Trainee

Gammal Tech, Alexandria, Egypt

Oct 2022 - Nov 2023

- Learned programming fundamentals using C and C++.
- Studied Object-Oriented Programming (OOP) concepts.
- Practiced problem-solving and basic algorithm development.
- Built simple console-based applications.

Full Stack Developer Trainee

AMIT, Cairo, Egypt

mar 2025 – oct 2025

- Built responsive web applications using HTML, CSS, and JavaScript
- Learned Full Stack Web Development using React.js for front-end development
- Developed back-end applications using PHP and Laravel framework
- Worked with databases using MySQL and implemented CRUD operations
- Applied MVC architecture concepts using Laravel
- Consumed and tested RESTful APIs using Postman
- Collaborated on developing 3 full-stack projects during the training, covering both front-end and back-end development (e.g., Dashboard, e-commerce and CRUD system).

Projects

CRUD APP ([Live Demo](#) | [GitHub](#))

Technologies: HTML, CSS, JavaScript, Local Storage

A web application that performs full CRUD operations for managing data using pure JavaScript.

- Developed a fully functional CRUD system using Vanilla JavaScript
- Optimized data handling and state updates without external libraries
- Implemented client-side data persistence using LocalStorage
- Improved user experience with dynamic rendering and clean UI interactions

Academy Website ([Live Demo](#) | [GitHub](#))

Technologies: React.js, JavaScript, CSS, Bootstrap, i18next

A modern and responsive educational platform UI for showcasing programming courses and learning content.

- Developed a multi-section responsive website using React.js
- Built reusable components for better scalability and maintainability
- Designed clean and modern UI inspired by real-world e-learning platforms
- Applied responsive design to ensure compatibility across all devices

Weather App ([Live Demo](#) | [GitHub](#))

Technologies: React Vite, Tailwind, Framer Motion, Leaflet, REST API

A responsive weather application that provides real-time weather data for any city using external APIs.

- Developed a real-time weather application using RESTful API integration
- Optimized data fetching and error handling for better performance and reliability
- Designed interactive UI with dynamic rendering based on user input
- Enhanced user experience with responsive layout and clean UI structure

Sport Dashboard ([Live Demo](#) | [GitHub](#))

Technologies: React Vite, Tailwind, Framer Motion, GSAP, React-icons

A modern sports dashboard interface that visualizes data, statistics, and user activities in an organized and interactive layout.

- Designed and developed a scalable dashboard interface for managing and visualizing data
- Implemented responsive layout using modern CSS techniques (Flexbox & Grid)
- Structured UI into modular components to improve maintainability and scalability
- Enhanced user experience with well-organized data presentation and intuitive navigation
